New Workforce Grant Application Process

Dear Providers,

Effective March 13, 2023, we have a new application process for registering for the ARPA Workforce Grants. Directors/Management please register for an account through ARPA module below or by accessing the portal link:

<https://elcecs.webauthor.com>.

There will be a login screen when you click the link above. Underneath the blue sign in button is a link that says Register (ARPA Grants). This is the button you will click to take you to the registration screen. You will be prompted to provide your information such as your name, email address, your reason for registering. Please enter Apply for ARPA Grants in the registration reason box & then click register.

Once your account has been approved, you will receive an automated message letting you know that your account has been approved & you will be able to log back into your account & create a profile for your school/program.

Once logged back in, the first step will be to click the blue button that says New Eligibility Request in the screen. It will take you to an application where you will enter the information for your school. If you already have a current provider profile through the statewide portal, then your school information should prepopulate for you without you having to fill in everything.

Once you submit that first initial application, our coalition will review that application. Upon approval you will gain access to apply for any of the workforce grants based upon eligibility requirements. If you receive multiple rejections & need assistance with registering for an account or a particular application please reach out to the workforcegrants@ecs4kids.org to schedule a virtual meeting to help walk you through the process.

Thank you,

Shecovia Grimes
