Executive Summary

The Head Start/Early Head Start Community Assessment for Northeast Florida, which includes Baker, Bradford, Clay, Duval and Nassau Counties, is updated annually to consider information that helps programs to better serve children and families in our community.

The 2019 Community Assessment identified the following:

- **Community Characteristics** of Northeast Florida
 - Population – The region’s population has grown by just over 5% over the past 5 years, less than the state, but more than the nation. All counties increased their population except for Bradford.
 - Demographics – Median age has increased, and with the exception of Nassau County, is younger than the rest of the state. The racial composition is predominantly Caucasian (66%) followed by African-American at 24%. The economy is strong with increasing incomes and decreasing unemployment, with strong job growth, particularly for full-time jobs.
 - Housing – Rental housing is scarce, with occupancy rates increasing in every county, resulting in fewer available units. Except for Clay County, the region is reducing the percentage of rental households that are cost-burdened, defined as paying 35% or more of their total income for rent.
 - Transportation – Like many areas in Florida, public transportation is used by a small percentage of the population (ranging from 0.0% in Baker to 1.8% in Duval), increasing pressure for households to have vehicles available for work and other necessities.

- **Poverty** trends for Northeast Florida
 - General population – Poverty has decreased from 16.1% to 14.4% overall, which reflects the improved economy.
 - Young Children – Despite the improvement in overall poverty, 24% of young children - those 5 years of age and younger – live in households earning less than the Federal Poverty Level.
 - Location of Children in Poverty – While young children in poverty live throughout the region, most are in Duval County (84%).
 - Demographics for People in Poverty – Poverty rates are higher than the general population for people who are of minority race and/or ethnicity, households headed by single parents and adults who do not have a high school diploma or equivalent.

- **Key Populations** for children with high needs for HS/EHS services
 - Children experiencing Homelessness – The percentage of children experiencing homelessness, including those experiencing housing instability such as living in a motel, continues to increase.
 - Children in Foster Care – The number of young children in foster care remains flat for the region overall, but individual county’s results vary, with

increases in Clay and Nassau and decreases in Baker, Bradford and Duval.

- Children with Disabilities – Young children who are receiving disability services continues to increase.
 - Households receiving Public Assistance – Northeast Florida has a higher percentage of households receiving Food Stamps and Cash Public assistance than the Florida or U.S. averages.
 - People who are fluent in English – Northeast Florida has a high percentage of the population who are fluent in English than the state or nation. For those who do speak another language, Spanish is the most common.
 - Eligible Children by Age – Births covered by Medicaid is a proxy for children who are eligible by age.
- **Birth Trends** of Infants and Mothers
 - Births to Teen Mothers – The percentage of births to young mothers (15 to 19) continues to drop except in Nassau County.
 - Low Birth Weights – Infants with low weights at birth has increased over time, which is often associated with a lack of prenatal care, except in Clay County.
 - Infant Deaths – The number of infants who have died has decreased from 131 in 2014 to 141 in 2018.
 - Births with adequate Prenatal Care – The percentage of mothers with adequate prenatal care increased in Baker, Bradford and Clay Counties, but decreased in Duval and Nassau.
- **Health Trends** for Northeast Florida
 - Adult Physical and Mental Health – Adults report poorer health in Northeast Florida than the state average, and the most prevalent health risk factors are being overweight or obese or smoking.
 - Health Provider Availability – Northeast Florida has increased physician and dentist availability.
- **Nutrition Needs** for Children and Families
 - Food Insecurity – Northeast Florida, like other areas, has improved in food security, identified as reliable access to enough affordable, nutritious food.
 - Special Supplemental Nutrition program for Women, Infants and Children (WIC) – Northeast Florida has mixed results in serving eligible women and children over time. Baker was the only county with an increase.
- **Childcare Trends** for Children and Families
 - Availability – Availability of care for infants through pre-kindergarten varies by county compared to school-age children.
 - Need – The need exceeds capacity in every county, with an unmet need overall of has increased faster than the availability, with an unmet need of almost 6,000 young children needing care.
 - Quality – Providers who have obtained a quality rating comprise 32% of the total.

- Kindergarten Non-Promotions – While the percentage of children who do not advance to first grade after kindergarten has decreased over time, the percentage is higher than the state in every county (range is 4.1% to 11.9% compared to 3.2% for Florida).
 - Cost – Childcare costs for a typical family – 2 adults, 1 school-age child, 1 preschool child – consume 19% to 24% of the household survival budget, depending on the county.
 - Cost Assistance – The community has made progress with the number of vouchers available for childcare cost assistance, increasing from 9,090 in 2014 to 12,387 in 2018.
 - Parent Schedules – Parents need care for children when working or attending school or job training. A higher percentage of parents with children under 6 are working than the general population, but a smaller percentage are in school or training.
- **Resources for Children and Families**, including resources for Children with Disabilities, United Way 211 referrals for Social Services, Housing, Early Learning Coalitions and the Department for Children and Families.

Introduction

Episcopal Children's Services provides Head Start and Early Head Start in the Northeast Florida region under our Northeast Florida grant from the Office of Head Start (04CH10107) serving 5 counties: Baker, Bradford, Clay, Duval, Nassau

- Early Head Start funded enrollment – 260
- Head Start funded enrollment - 300

Head Start/Early Head Start is a free program for children of families with low-incomes, providing comprehensive early learning in both center-based and home-based settings. This successful program helps ensure children's readiness for school and increases parental knowledge in children's growth and development. Episcopal Children's Services Head Start program provides full-day center-based early learning to children ages 3-5 years of old and the Early Head Start program provides full-day, full-year center-based and home-based early learning to pregnant women and children birth to three years of age. The program also provides additional family supports such as literacy workshops and parenting skills training and targeted attention on meeting specialized needs regarding children with disabilities, behavioral challenges and health concerns.

The Head Start/Early Head Start program provides inclusive services in the areas of health, mental health, nutrition, disabilities and parent and community engagement, in addition to early childhood education as part of a comprehensive approach to school readiness. All children are screened for developmental progress, health, dental, vision and hearing. Head Start offers a nutrition assessment and provides daily nutritious snacks and meals. Any identified concerns are referred to the appropriate professional for treatment. The Head Start/Early Head Start staff understand that to support the child, they must support the whole family and parent involvement in the classroom and the program is highly encouraged. Parents are their children's first teachers and the staff work with the parents to understand and care for the children enrolled in our programs.

Early Head Start and Head Start grantees are required to conduct a community-wide needs assessment at least once over the five-year grant period and update annually. The purpose of the Community Needs Assessment is to gather information to better understand the people served through the Early Head Start and Head Start program, and to design program interventions that meet their needs. The data from the Community Needs Assessment will be used to design the program—including how children are selected into the program, what services are offered, and where program services are provided.

Community Characteristics

Geography

The Northeast Florida Region encompasses five counties – Baker, Bradford, Clay, Duval and Nassau.

Governing Structure

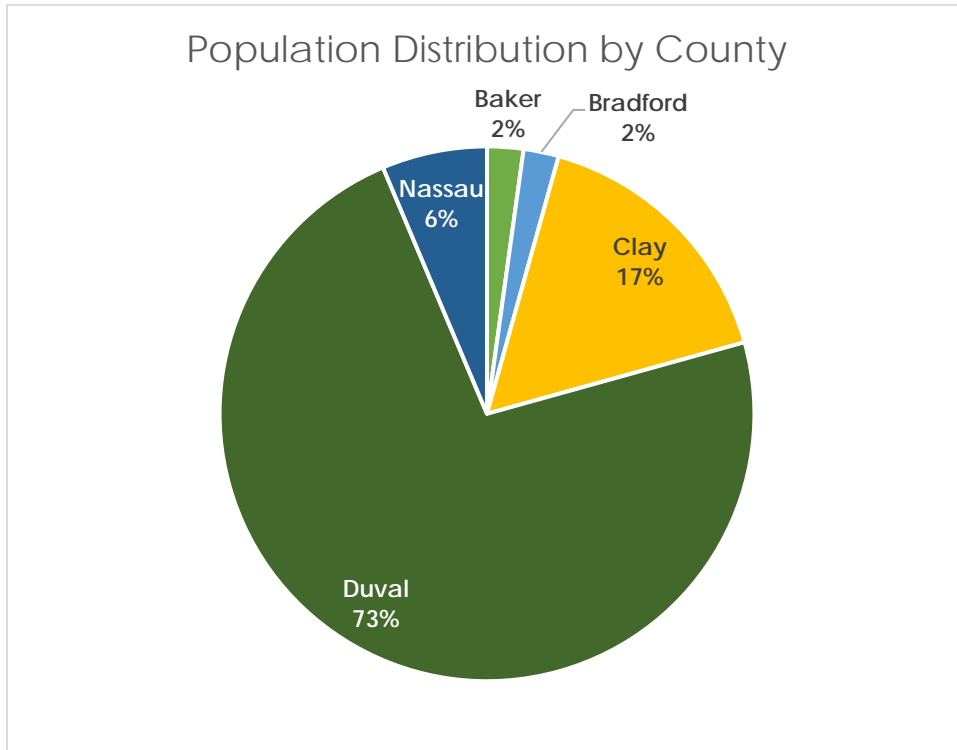

Duval County is the only county without a County Board of Commissioners, as Duval County and the City of Jacksonville were consolidated in 1968, which eliminated any separate county operations. Baker, Bradford, Clay and Nassau Counties are governed by Boards of Commissioners and local municipalities are governed independently.

Population

Population by County

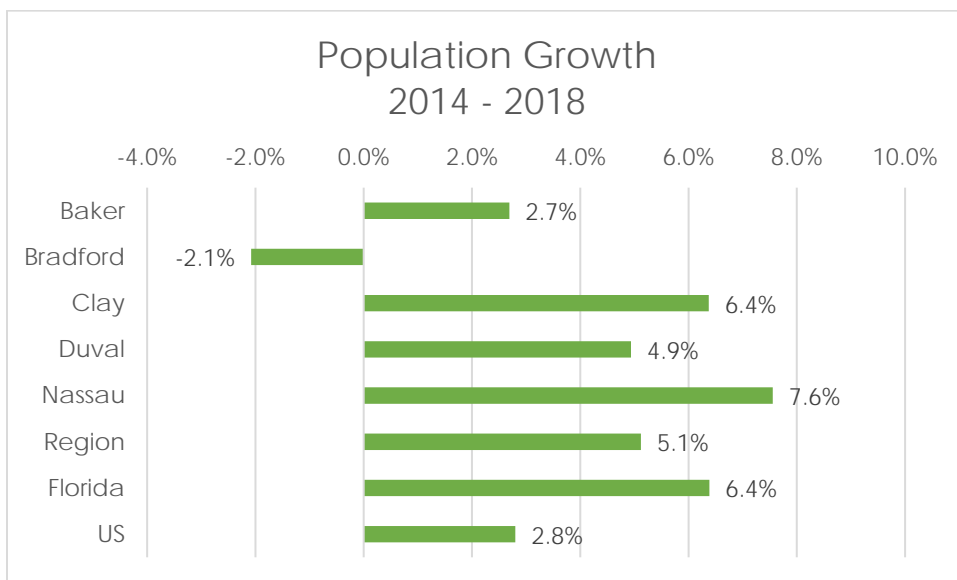

Population by County	
Baker	27,785
Bradford	26,979
Clay	207,291
Duval	924,229
Nassau	80,578

While the counties are relatively similar in area, the population is concentrated predominantly in Duval and Clay.

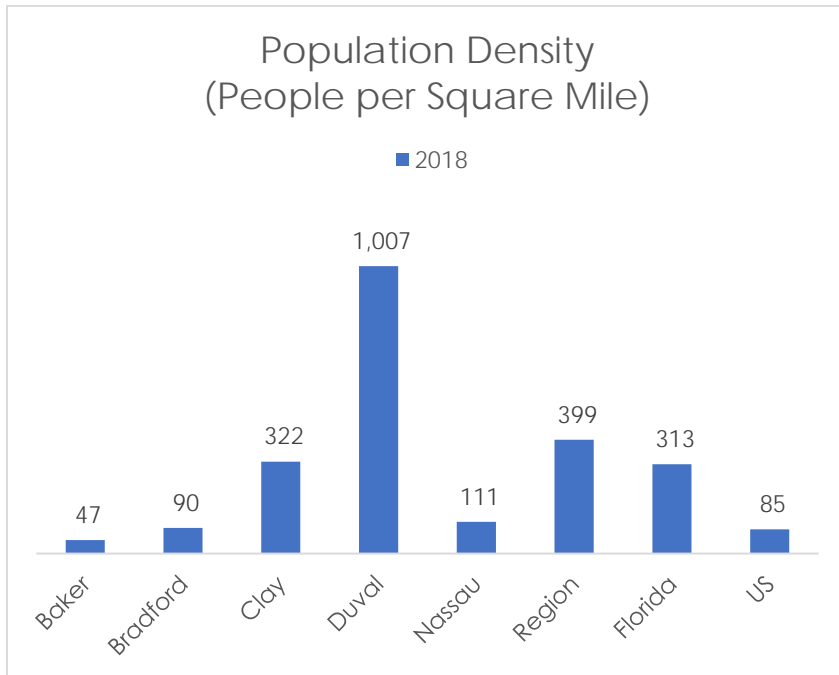

Population Growth

The Northeast Florida region is growing faster than the national average but slower than the state average. All counties except Bradford have increased population in the past 5 years.

Population Density

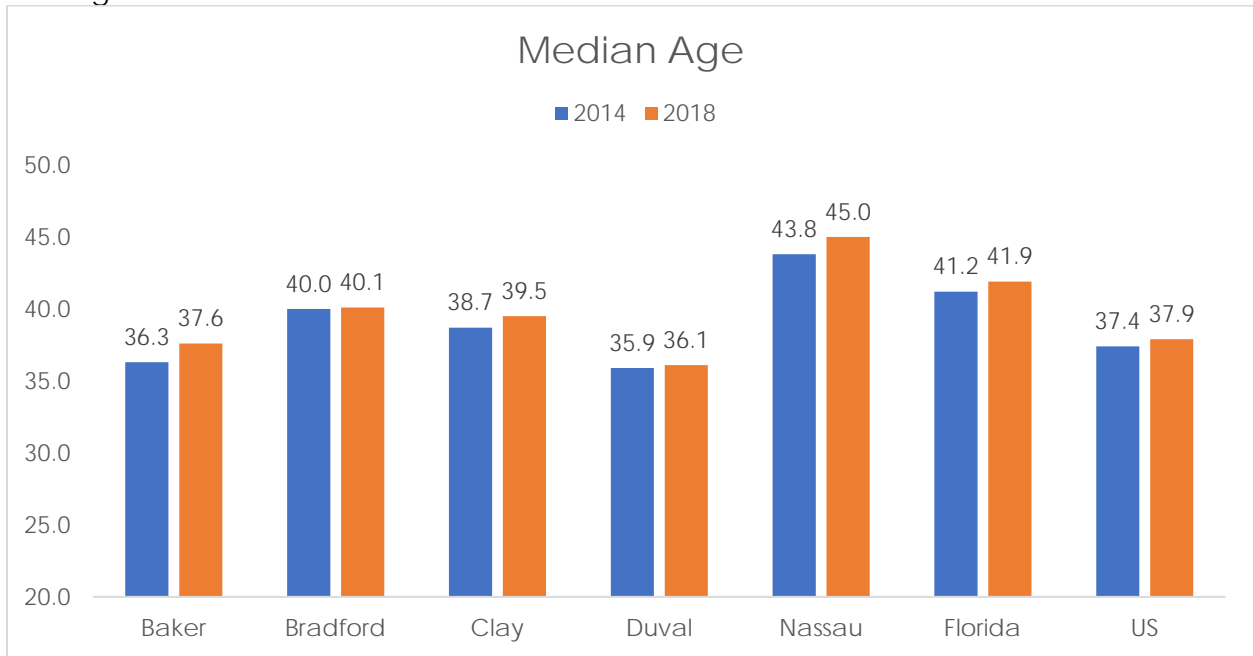

Duval County is predominantly an urban community. Baker, Bradford, Clay and Nassau are much less dense than Duval.

Demographics

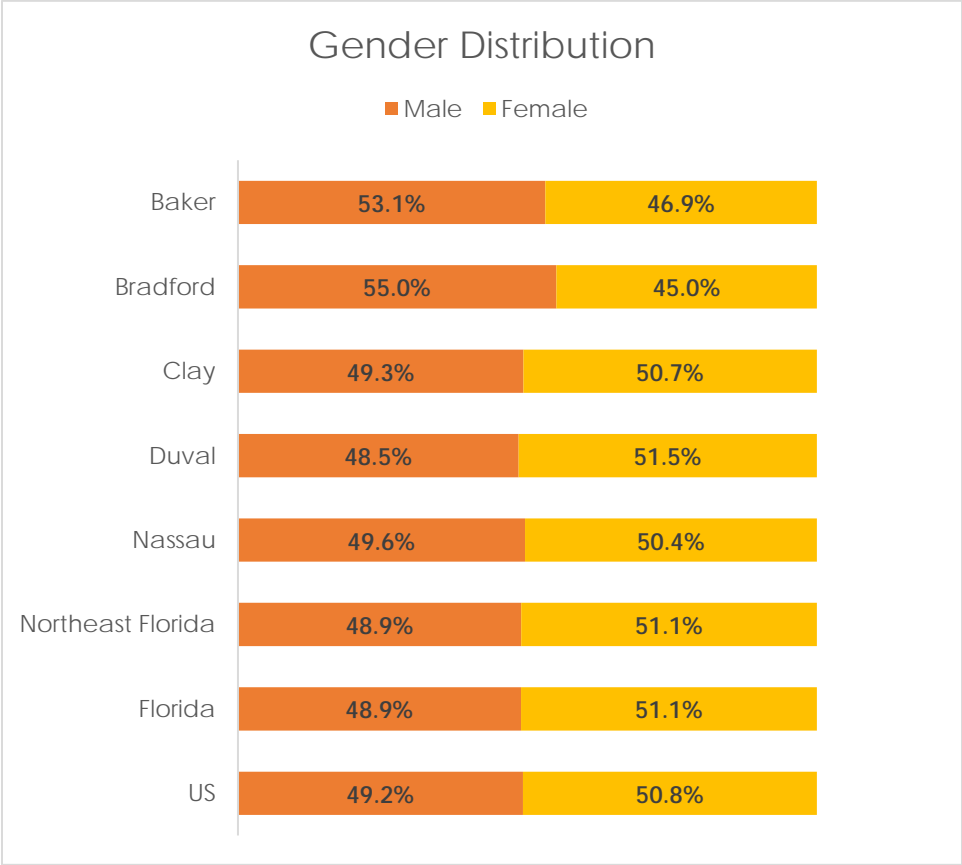

Age

The national population is aging as seen with the increase in the median age of the population, where half are younger, and half are older. Every county in the region is also trending up. The first chart shows the change in median age over the past 5 years, while the second chart highlights the differences in median age from the national average.

Gender

Baker and Bradford have a higher percentage of males than females, differing from the region, state and national composition.

Race and Ethnicity

The racial composition of the region is predominantly white.

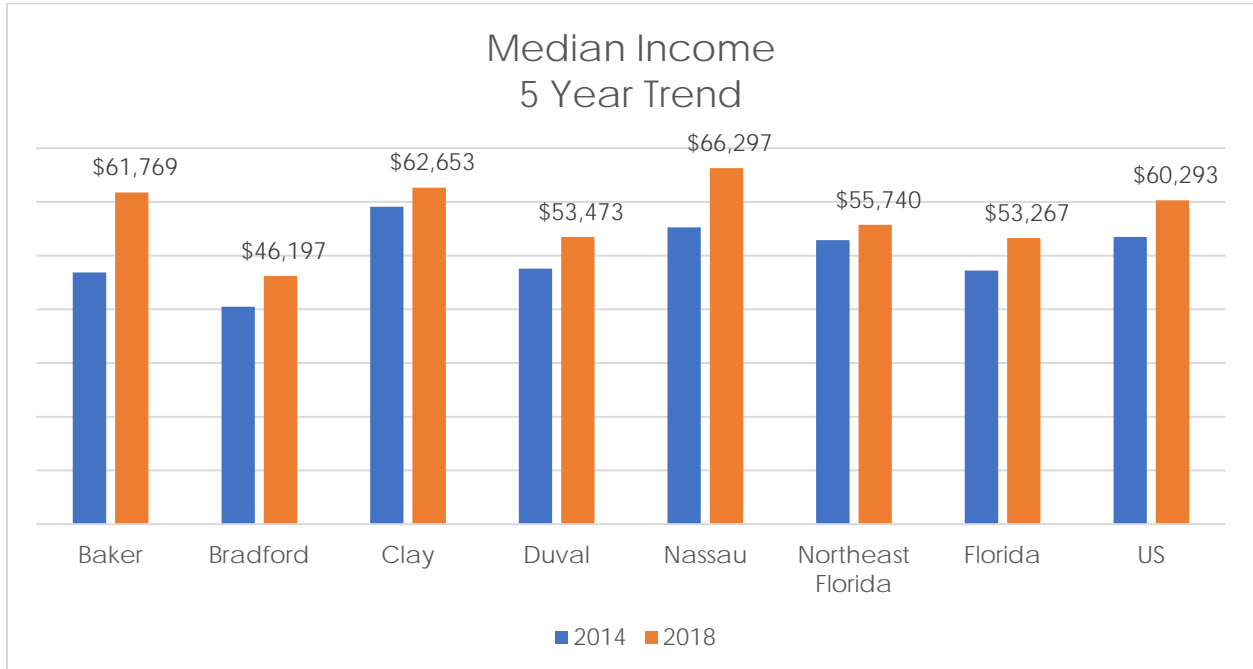

The percentage of the population that is Hispanic or Latino ethnicity is much lower in the region than the state average.

Economy

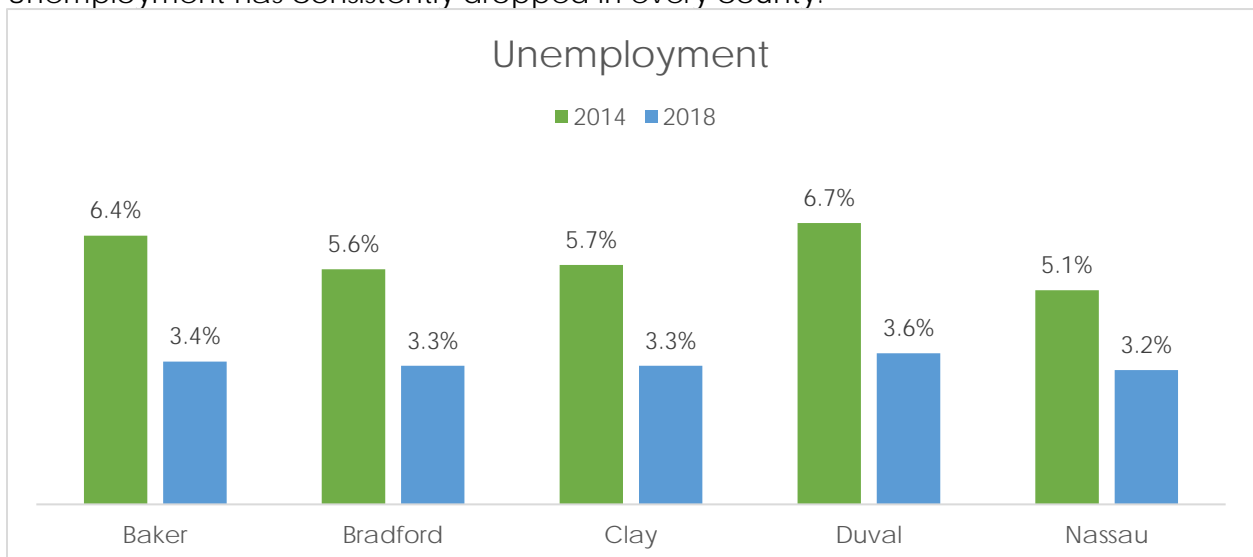

Median Income

Median household income is the most common economic measure for financial health of a community as it identifies the level where half of households earn more, and half earn less. Median income has increased over the five year period, showcasing the economic recovery over time.

Unemployment

Unemployment has consistently dropped in every county.

Job Growth

The number of people employed has also grown. Full-time jobs are increasing faster than part-time jobs, with the percentage of people working full time now up to 67% of those working.

The table identifies the changes in full and part-time jobs by county.

	Full-Time 2014	Full-Time 2018	Change	Part-Time 2014	Part-Time 2018	Change
Baker	7,493	8,215	722	3,601	3,664	63
Bradford	7,013	7,023	10	3,190	3,063	(127)
Clay	60,564	67,936	7,372	36,426	36,484	58
Duval	290,353	327,900	37,547	154,316	156,020	1,704
Nassau	22,302	25,818	3,516	13,704	14,506	802

Housing

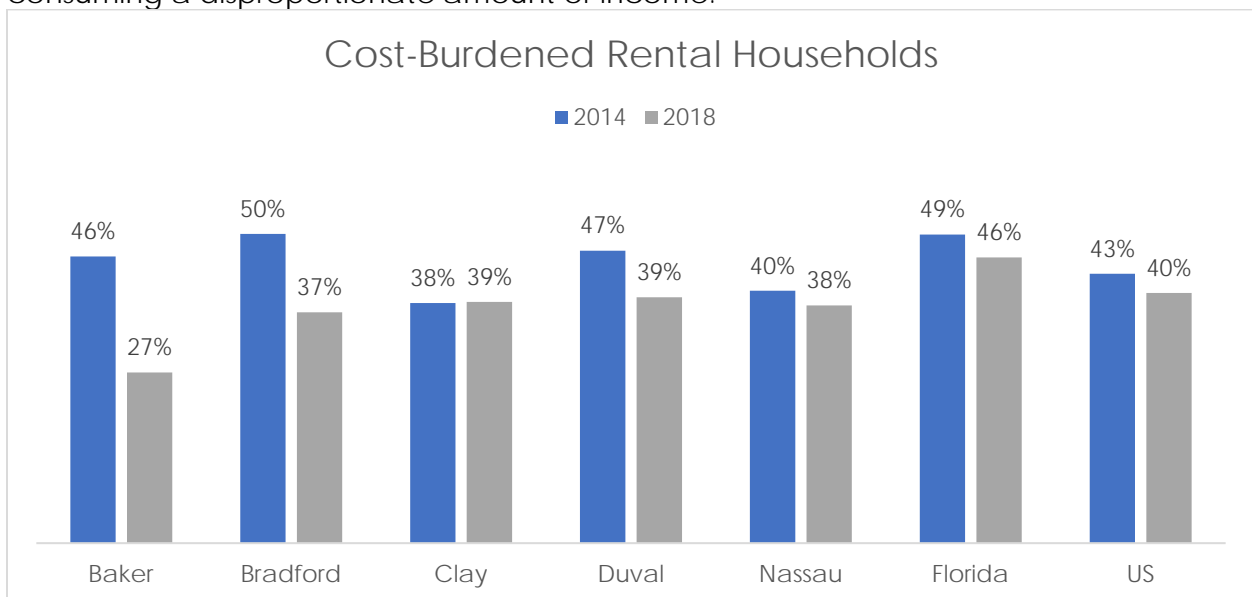

Availability

High occupancy rates signal intense competition for rental housing, which often leads to increases in rental costs.

Affordability

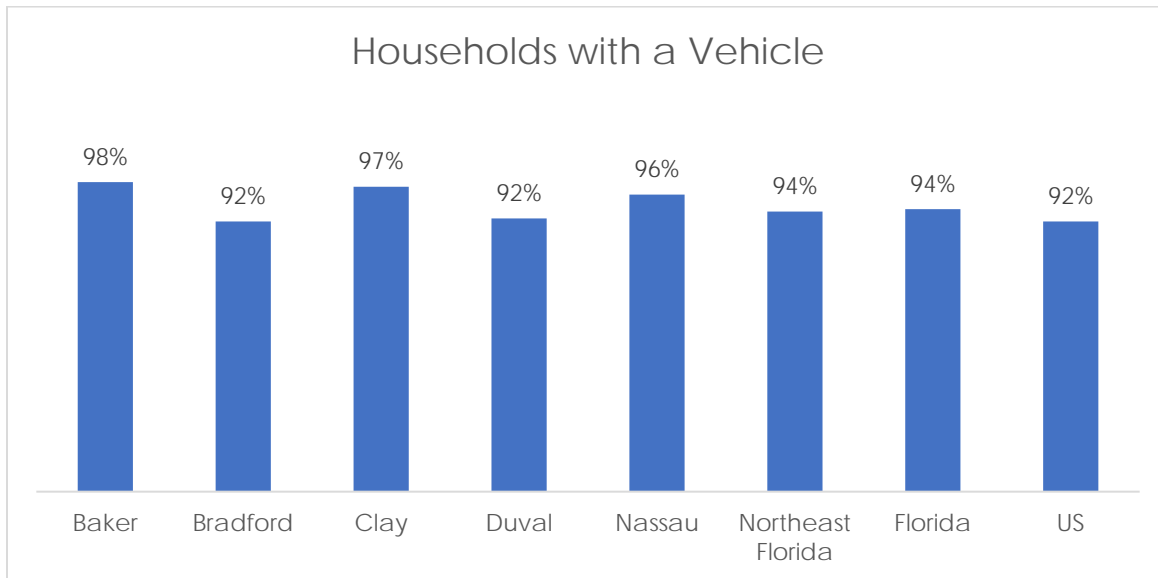

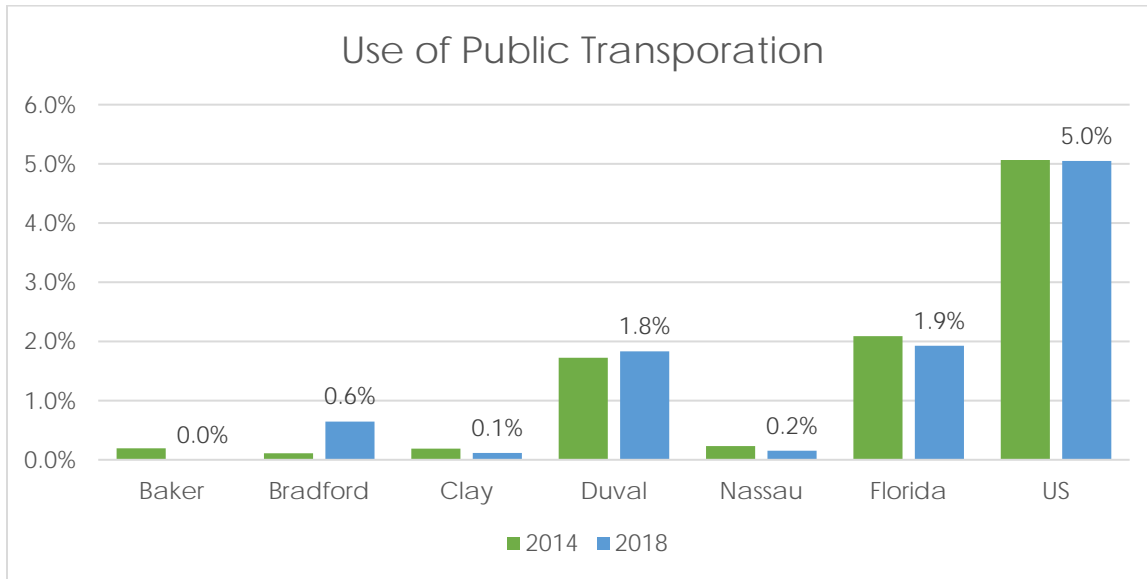

A household paying 35% or more of their total income for rent is cost-burdened because it limits the dollars available for other necessities. With the exception of Clay County, the region is reducing the percentage of rental households with rents consuming a disproportionate amount of income.

Transportation

Public Transportation Utilization

Public transportation is used by a very small portion of the population, which creates pressures for households to have a vehicle available for travel to work, school and other necessities.

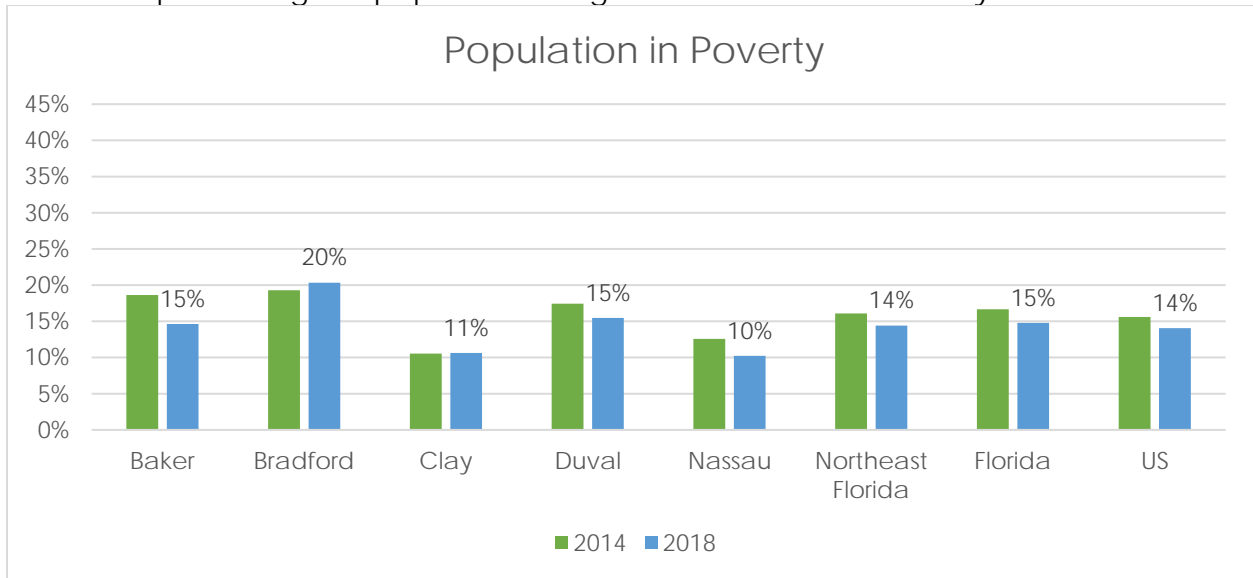

Poverty

Trends

Total Population

The strengthening economy is seen with an overall drop in the percentage of population in poverty for the region. Bradford and Clay differ from the region, with an increased percentage of population living below the Federal Poverty Level.

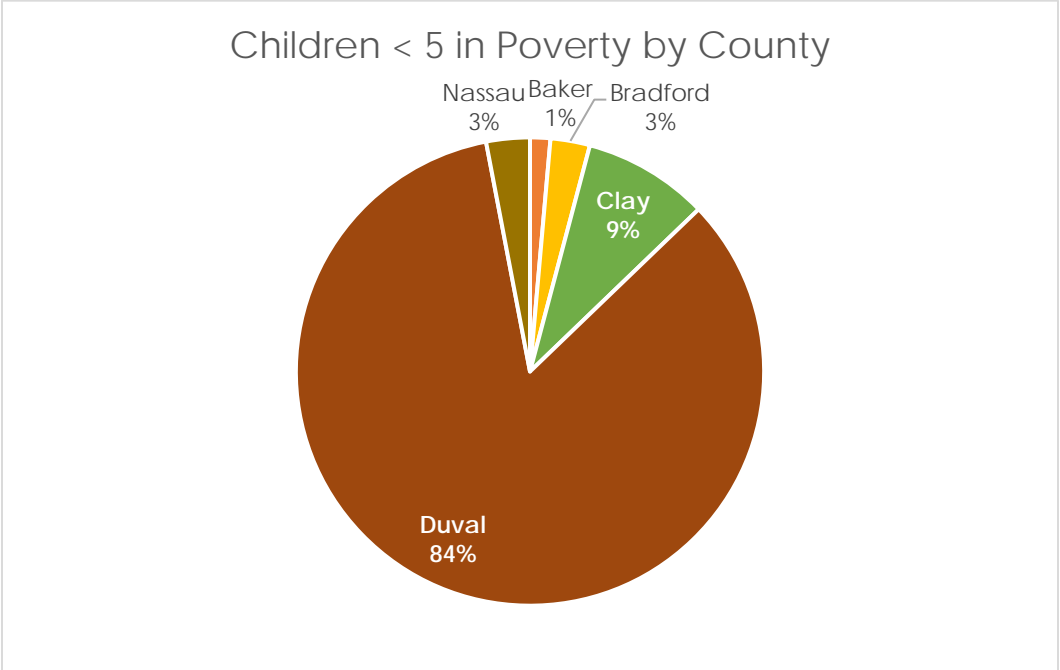

Young Children

The rate of poverty for young children – 5 and under – is much higher than the general population.

Location

The graph identifies what county is the home to young children in poverty. The population distribution of the general population is shown again for comparison.

Demographics and Poverty

Differences are seen between the poverty rates for the general population and key demographics.

Race/Ethnicity

Minorities are disproportionately represented for the population in poverty versus the population. Minorities are 34% of the total population, yet account for 48% of the population in poverty.

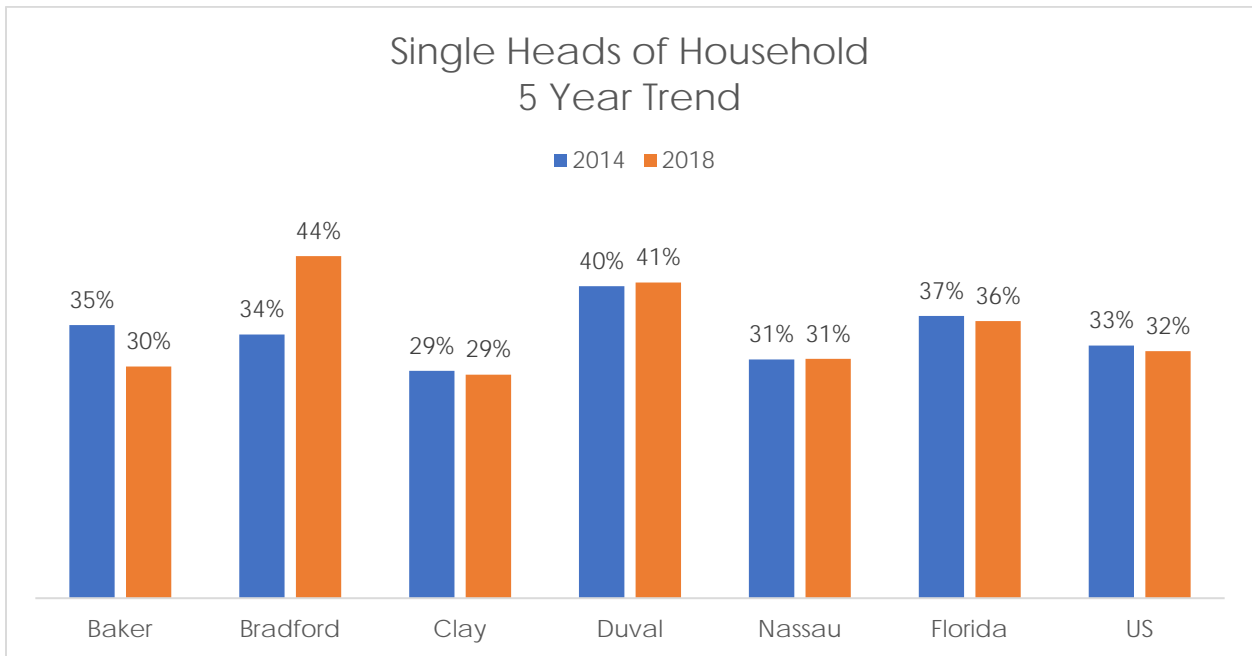

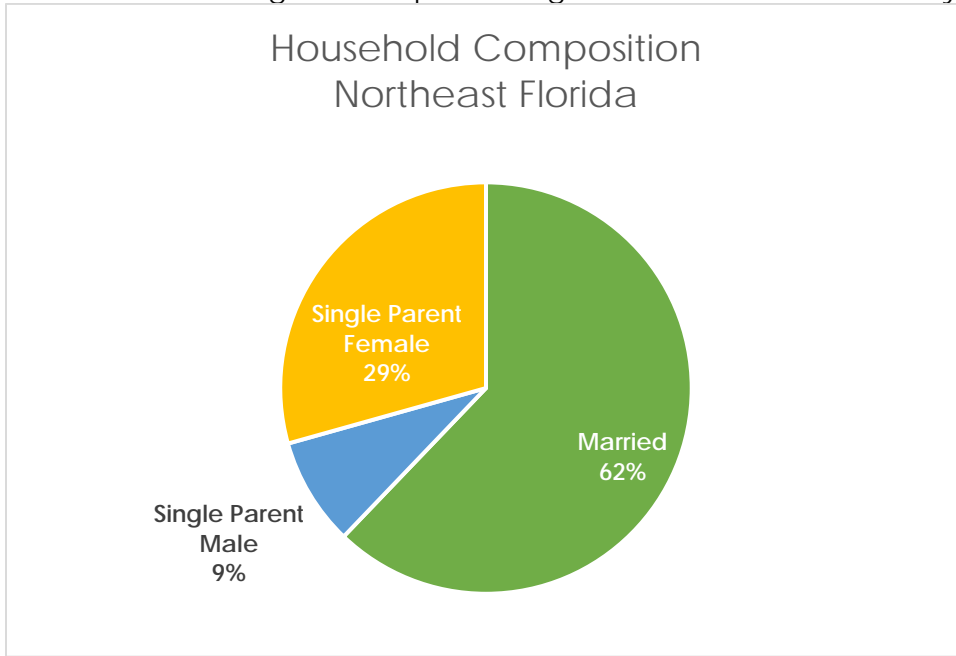

The table shows the breakdown of poverty rates for the largest minority populations – African-Americans and Hispanic.

Northeast Florida			
	Population	# in Poverty	Poverty Rate
Total	1,236,750	178,163	14%
African-American	299,747	70,039	23%
Hispanic	108,610	19,209	18%

Marital Status

While 62% of children live in households with two married parents, the second chart identifies the changes in the percentage of households headed by single parents.

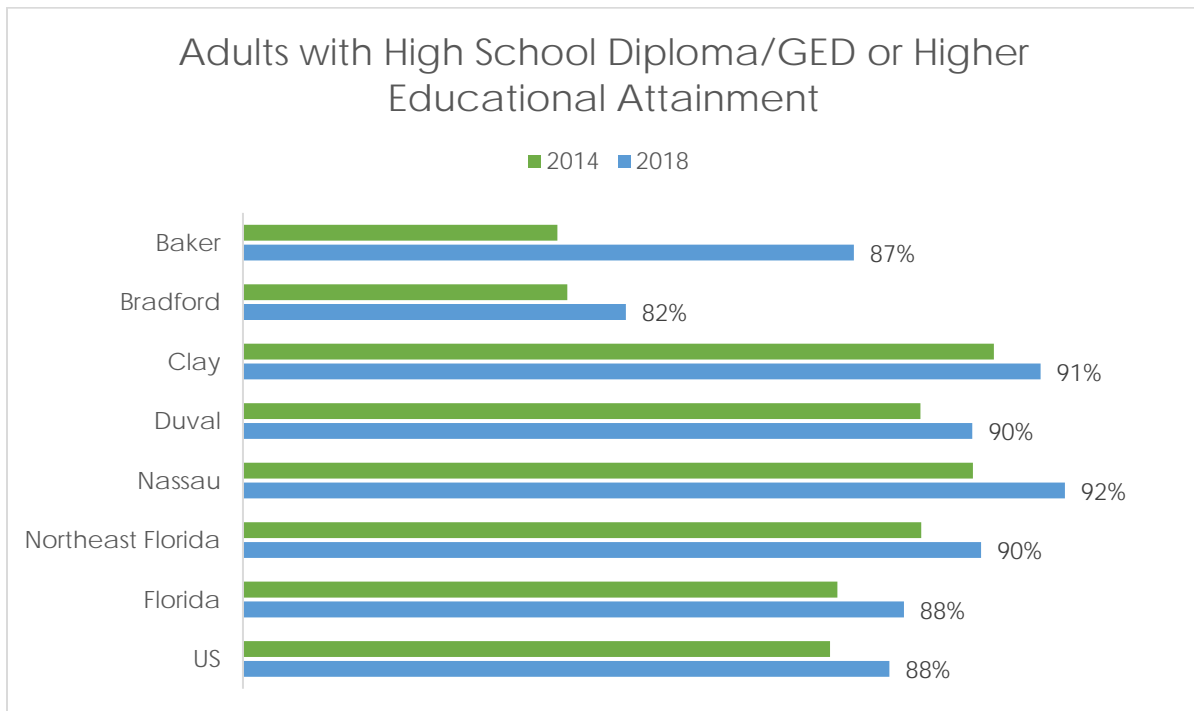

Poverty rates differ dramatically for single Heads of Household. Divorce or single parenthood results in the adults maintaining two households instead of one, and families headed by a single parent tend to struggle emotionally as well as financially.

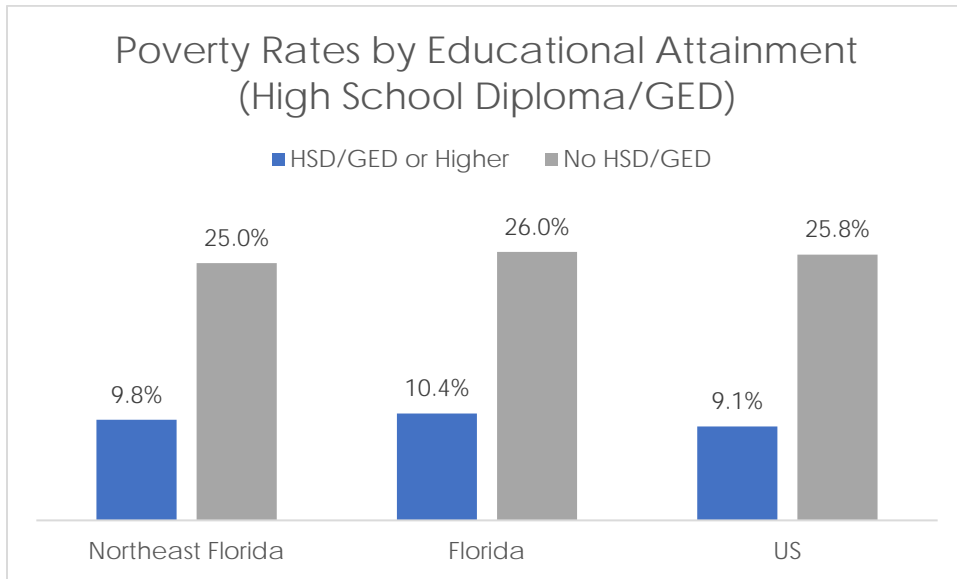

Educational Attainment

The percentage of adults who have a High School Diploma or GED equivalent or higher education continues to increase over time.

Adults who do not have a minimum of a High School Diploma or equivalent have higher levels of poverty.

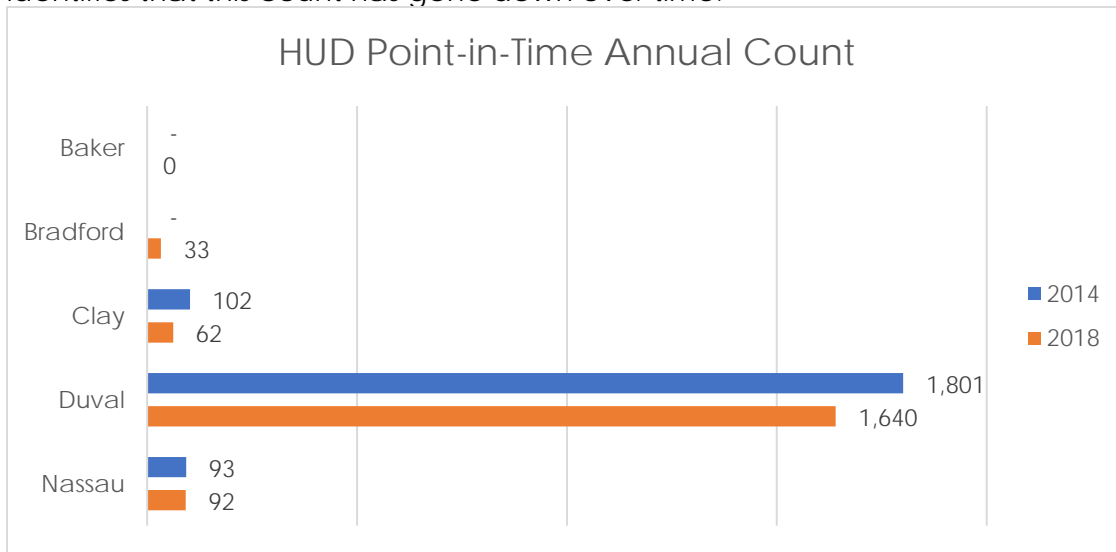

Poverty Rates by Educational Attainment		
	HSD/GED or Higher	No HSD/GED
Baker	9.6%	35.6%
Bradford	14.6%	28.7%
Clay	7.8%	23.7%
Duval	10.3%	29.7%
Nassau	7.7%	28.4%
Northeast Florida	9.8%	25.0%
Florida	10.4%	26.0%
US	9.1%	25.8%

Key Populations

Children Experiencing Homelessness

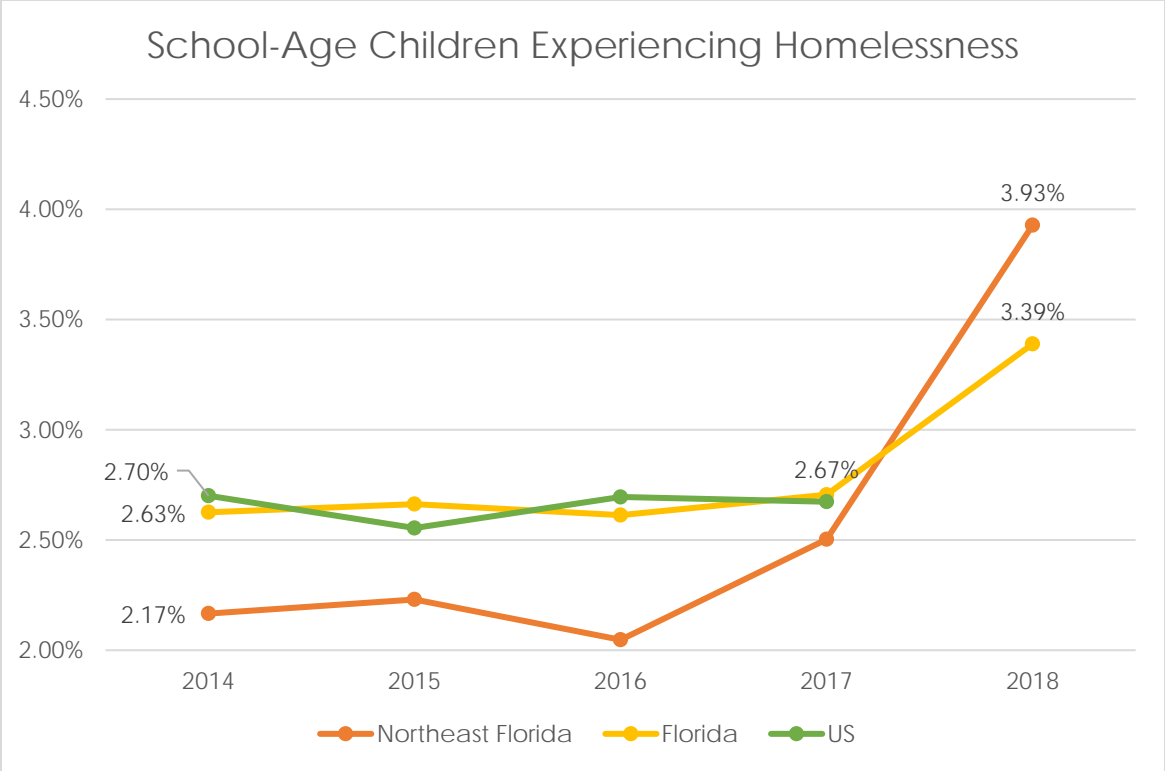

HUD Point-in-Time

There are two sources of data to estimate homelessness with different approaches and definitions of homelessness. The HUD Point-in-Time Count is a one-night annual census that counts people either on the street or in an emergency shelter. Because homeless families are fearful of having children removed into foster care, they are often missed in these counts. HUD Point-in-Time data is for all ages, both adults and children. The graph identifies that this count has gone down over time.

McKinney-Vento

Head Start uses the definition from the McKinney-Vento Act, which requires public schools to collect and report data on students experiencing homelessness. The definition is more expansive and includes students who are living in any type of non-permanent housing, such as living in motels, staying with friends or staying with other family members. Data is counted throughout the school year.

	2014	2018
Baker	112	98
Bradford	194	155
Clay	1,110	730
Duval	2,111	5,825
Nassau	428	547
Florida	71,446	96,028

Children in Foster Care

Young children in foster care are increasing in some areas, even though the numbers are decreasing at a state level. The table shows the numbers and percentage change, with the graph showing the differences in percentage changes for the counties, the region and the state.

	2014	2018	Percentage Change
Baker	16	14	-13%
Bradford	13	6	-54%
Clay	71	77	8%
Duval	470	447	-5%
Nassau	26	54	108%
Northeast Florida	596	598	0%
Florida	9,553	8,381	-12%

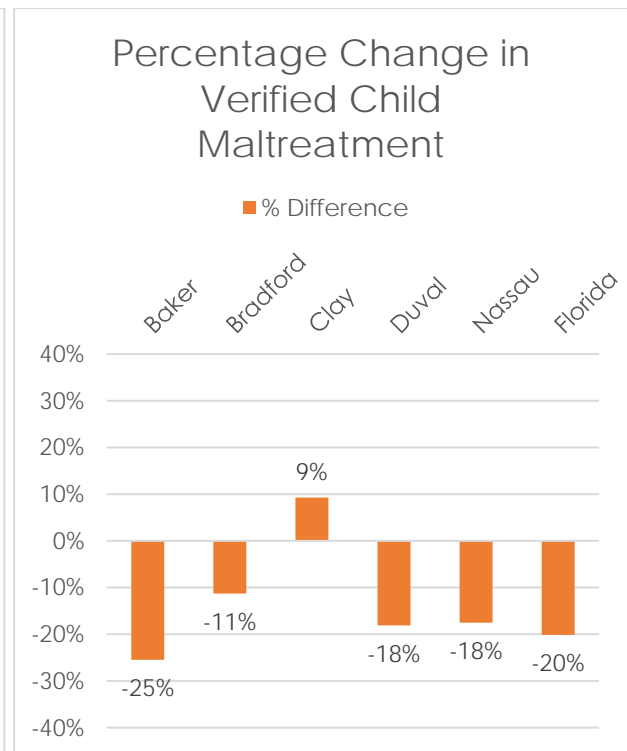

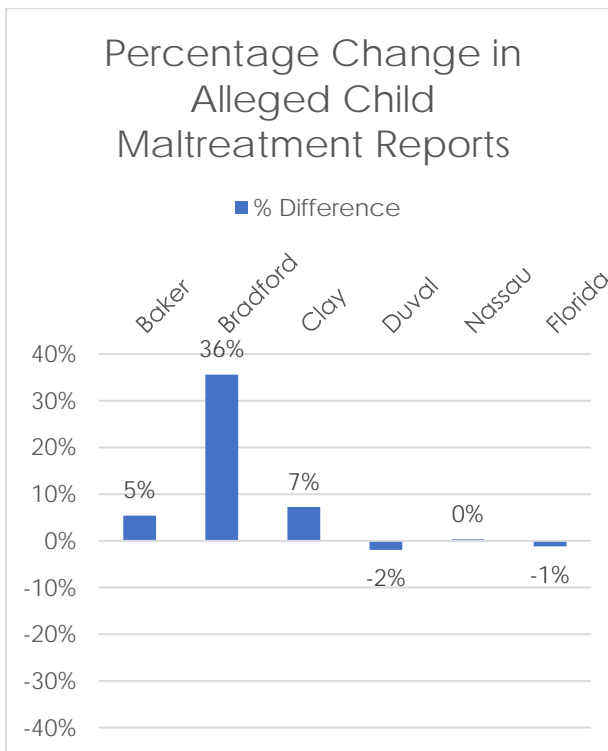

Maltreatment Reports

When child maltreatment is reported, the case is investigated to see if the maltreatment can be verified. The graphs and tables show changes over time.

Reports of Child Maltreatment				
	2014	2018	Difference	% Difference
Baker	1,131	1,192	61	5%
Bradford	905	1,227	322	36%
Clay	5,791	6,211	420	7%
Duval	27,626	27,093	-533	-2%
Nassau	1,771	1,777	6	0%
Florida	447,720	442,423	-5,297	-1%

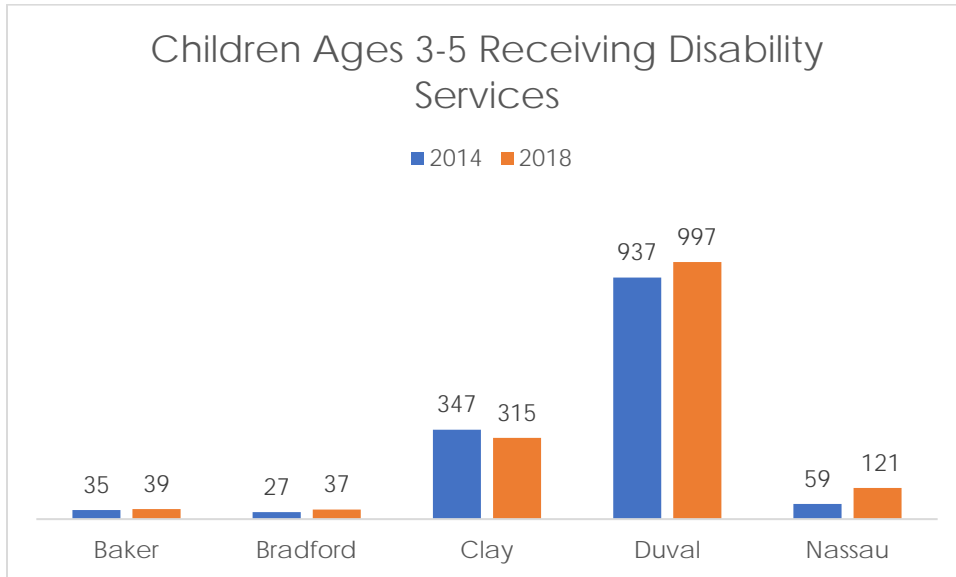

Verified Child Maltreatment				
	2014	2018	Difference	% Difference
Baker	106	79	-27	-25%
Bradford	62	55	-7	-11%
Clay	496	542	46	9%
Duval	2,800	2,293	-507	-18%
Nassau	217	179	-38	-18%
Florida	46,231	36,924	-9,307	-20%

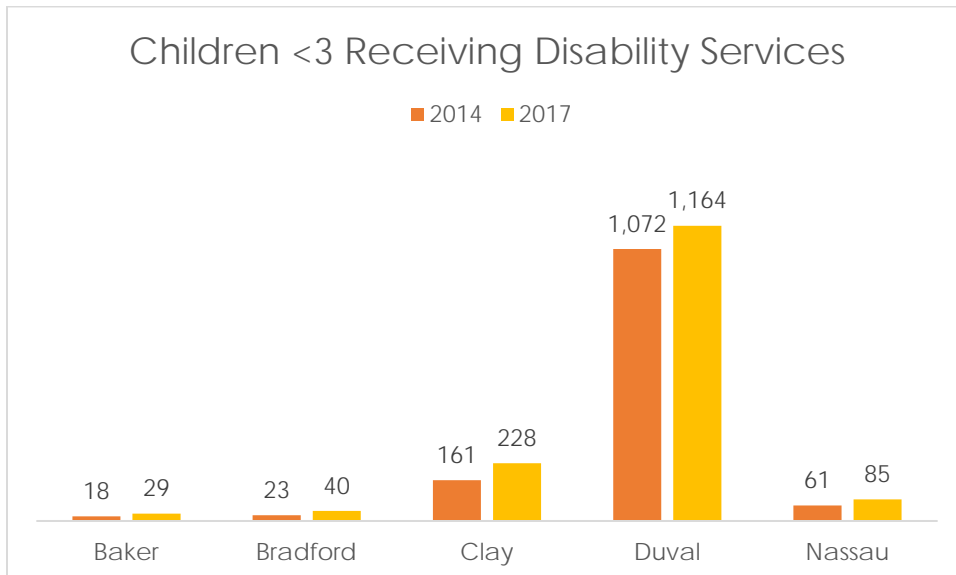

Children with Disabilities

Children with disabilities are prioritized for enrollment.

Overall, there is an increase in the number of children ages 3 to 5 with diagnosed disabilities, although there is not an increase in every county.

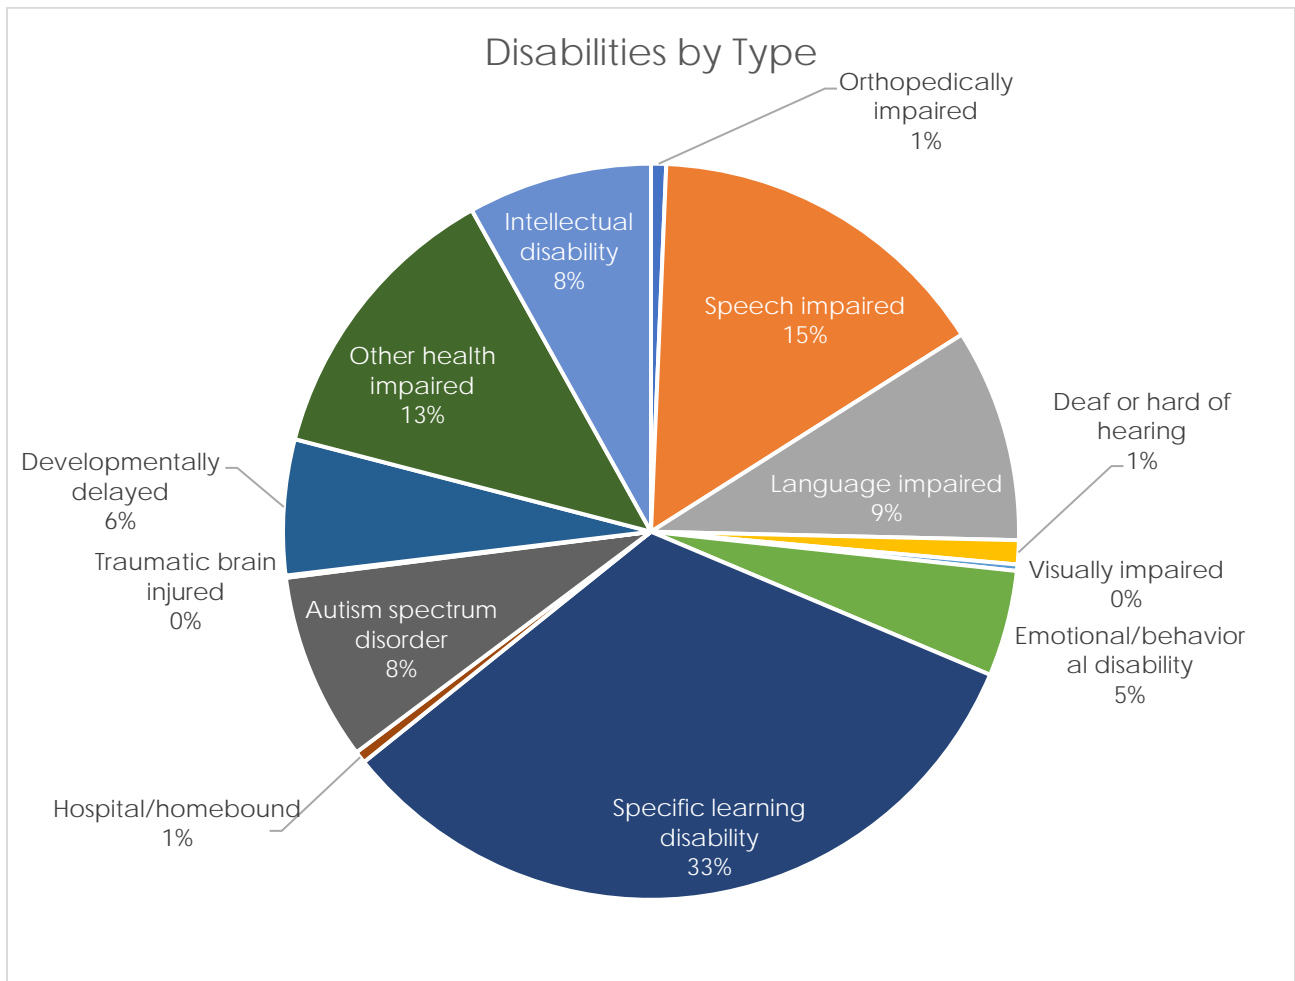

There are also increases in infants and young toddlers, with increased numbers in every county.

Types of Disabilities

The public school systems publish data on the types of disabilities for children.

Households with Public Assistance

A higher percentage of households in Northeast Florida receive public assistance than the state and the nation. Food Stamps, or SNAP, is the most prevalent form of public assistance, and helps low income families afford healthy food. Cash Public Assistance is temporary, and families must meet the technical, income and asset requirements. Generally, adults must be working or in full-time job training. Supplemental Security Income, or SSI, is designed to provide basic needs for blind or disabled people with little to no income.

Percentage of Households with Public Assistance			
	Food Stamps/SNAP	Cash Public Assistance	SSI
Baker	17.8%	2.5%	8.2%
Bradford	19.5%	1.3%	8.5%
Clay	10.7%	1.6%	4.2%
Duval	16.2%	2.8%	5.3%
Nassau	10.4%	2.0%	4.6%

English Fluency

The graph identifies languages spoken in the region. The great majority – 87% - speak only English.

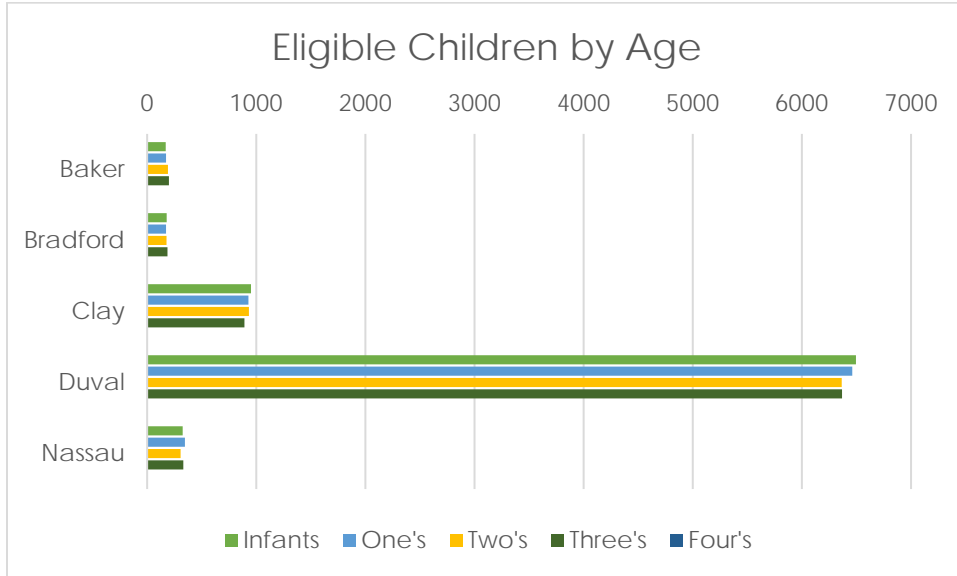

The chart identifies the percentage of the population who speak “only English” and those who “speak English very well” for each county as well as the state and the US. Overall the region has higher levels of the population who are fluent in English than the rest of the state and US.

Eligible Children by Ages

The chart identifies the age ranges of eligible children based on births covered by Medicaid.

	Infants	One's	Two's	Three's	Four's
Baker	183	170	173	191	199
Bradford	179	179	173	177	186
Clay	980	952	928	933	892
Duval	6066	6,495	6,462	6,365	6,367
Nassau	304	326	346	307	331
Total	7,712	8,122	8,082	7,973	7,975

Birth Trends

Births to Teen Mothers

Women who become pregnant during their teens are at increased risk for medical complications and social consequences.

Low Birth Weights

When babies are born small, they are at risk for health and developmental issues in life. Low birth weights are often associated with a lack of prenatal care.

Infant Deaths

Infant mortality varies dramatically.

Infant Deaths		
	2014	2018
Baker	2	4
Bradford	2	1
Clay	13	10
Duval	110	123
Nassau	4	3
Total	131	141

Births with Adequate Prenatal Care

Healthy child development starts before birth. Women who receive adequate prenatal care are more likely to give birth to a healthy baby.

Health Trends

Adult Physical and Mental Health

Adults must be healthy themselves to care for children. This chart shows the percentage of adults who identify that they have good physical health and good mental health.

Health Risk Factors

While there are many factors that can influence adult health, the most prevalent are being overweight or obese or smoking.

Health Provider Availability

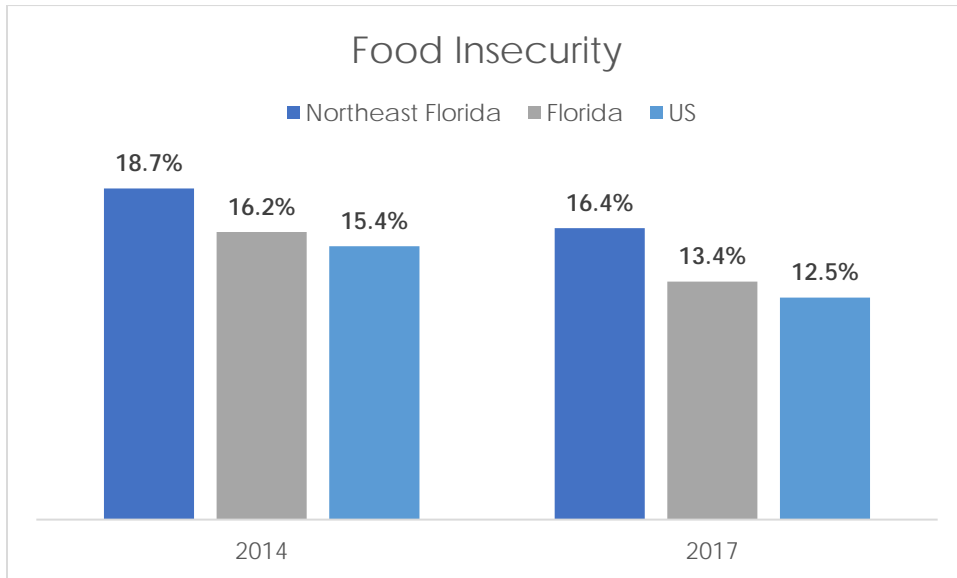

Adults and children need providers in the community to meet their health needs. The following charts show the numbers of physicians and dentists relative to the population.

Nutrition Needs

Food Insecurity

Lack of nourishing food causes health risks. Food insecurity is defined as the state of being without reliable access to a sufficient quantity of affordable, nutritious food. Feeding America used a combination of census data and clients surveys to calculate the rate of food insecurity at a county level.

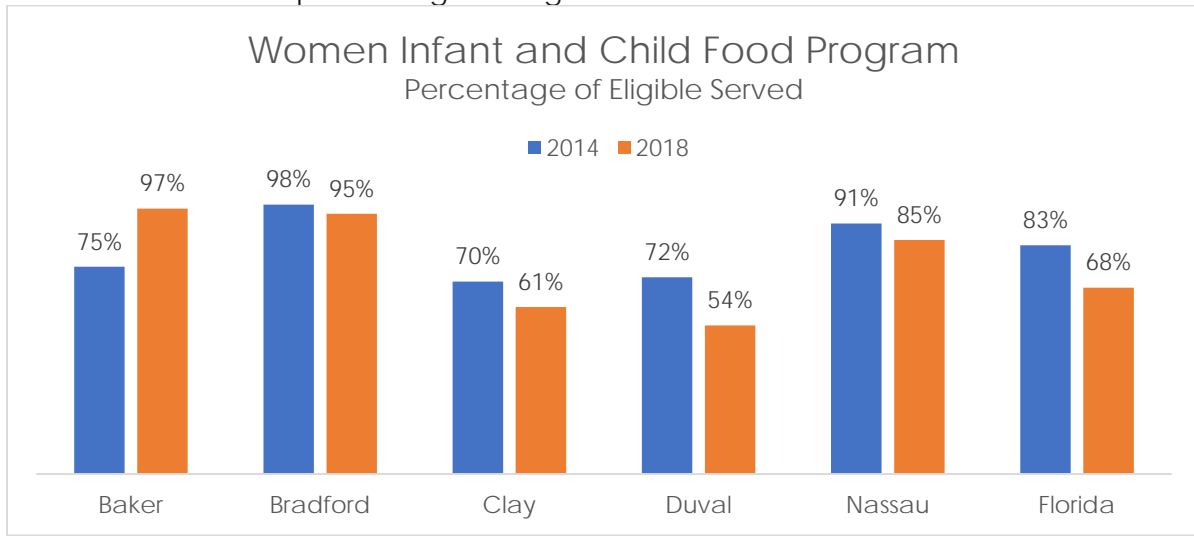

Population who is "Food Insecure"		
	2014	2017
Baker	17.3%	15.2%
Bradford	17.9%	16.7%
Clay	14.0%	12.3%
Duval	20.1%	17.7%
Nassau	14.5%	12.4%
Florida	16.2%	13.4%
US	15.4%	12.5%
Duval	20.1%	17.7%

WIC

The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) provides supplemental foods, health care referrals, and nutrition education for low-income pregnant, breastfeeding, and non-breastfeeding postpartum women, and to infants and children up to age five who are found to be at nutritional risk.

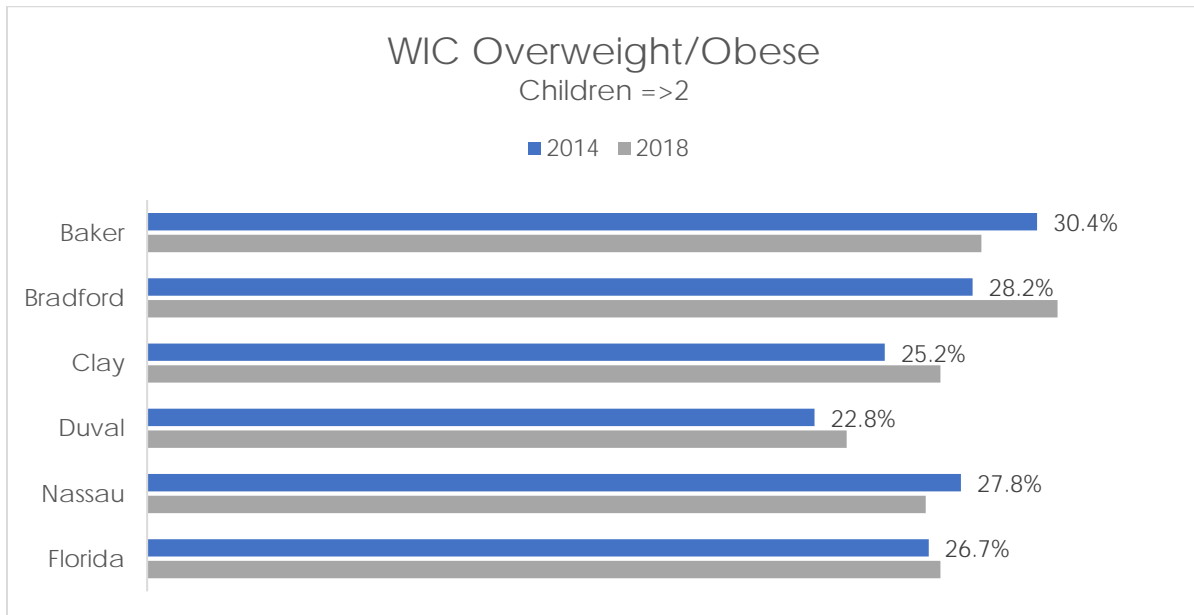

Participation Rates

The chart shows the percentage of eligible women and children served.

Children using WIC who are Overweight or Obese

Food insecurity creates increased risk of weight issues. The Florida Department of Health tracks data on young children on the WIC (Women, Infant and Children) Nutritional Program.

Childcare Trends

Availability

Types of Centers

Childcare is offered from multiple types of providers. Most providers are childcare facilities. There is also home-based care, either in a large home or traditional home.

	Centers	Large Home	Family Home
Baker	14	0	2
Bradford	15	0	0
Clay	110	1	16
Duval	540	23	113
Nassau	36	3	1

Child Care Availability for Infants – Pre-K

Not every childcare provider serves infants and/or children who have not yet entered kindergarten. The table identifies the capacity available by child’s age.

Child Care Capacity				
	School Age Only	Available for Infants through Pre-K	Total Capacity	Percentage School Age Only
Baker	-	1,125	1,125	0%
Bradford	238	974	1,212	20%
Clay	15,347	7,848	23,195	66%
Duval	28,866	42,679	71,545	40%
Nassau	780	2,517	3,297	24%
Florida	148,654	764,120	912,774	16%

Need

Working families need childcare. Childcare needs to be available and affordable for families to access the care they need.

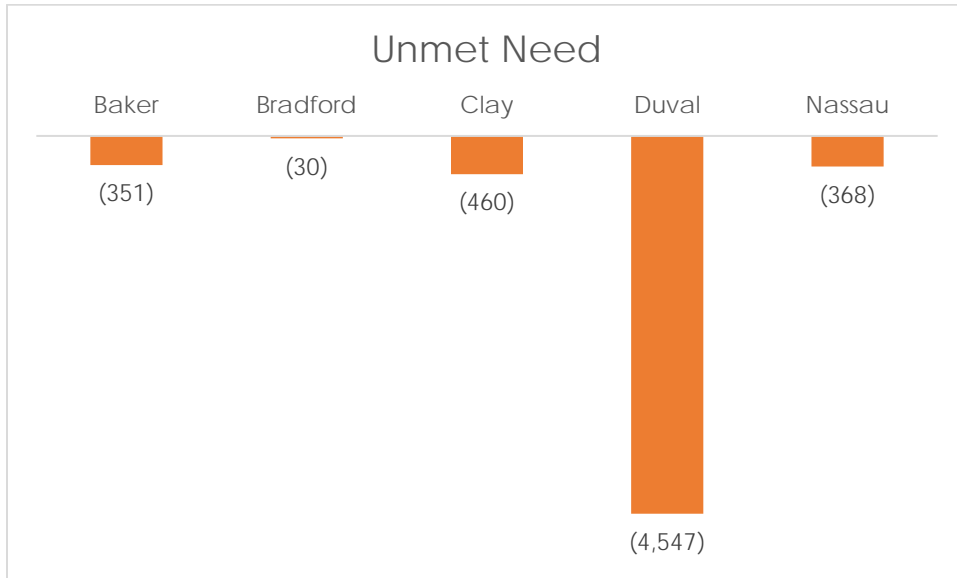

Childcare availability is impacted by changes in the number of families with young children where all parents are working.

Children <6 with all parents in household working			
	2014	2018	% Change
Baker	1,404	1,476	5.1%
Bradford	1,027	1,004	-2.2%
Clay	9,078	8,308	-8.5%
Duval	44,975	47,226	5.0%
Nassau	2,878	2,885	0.2%
Total	59,362	60,899	2.5%

Availability compared to Need

Every community has more need than capacity.

	Need	Capacity	Excess Capacity (Unmet Need)	Percentage
Baker	1,476	1,125	(351)	-24%
Bradford	1,004	974	(30)	-3%
Clay	8,308	7,848	(460)	-6%
Duval	47,226	42,679	(4,547)	-10%
Nassau	2,885	2,517	(368)	-13%
Region	60,899	55,143	(5,756)	10%
Florida	854,849	764,120	(90,729)	-11%

Quality

When childcare options are scarce, providers may not have as much incentive to improve quality. The Department of Children and Families provides information on the number of providers with a Gold Seal Rating.

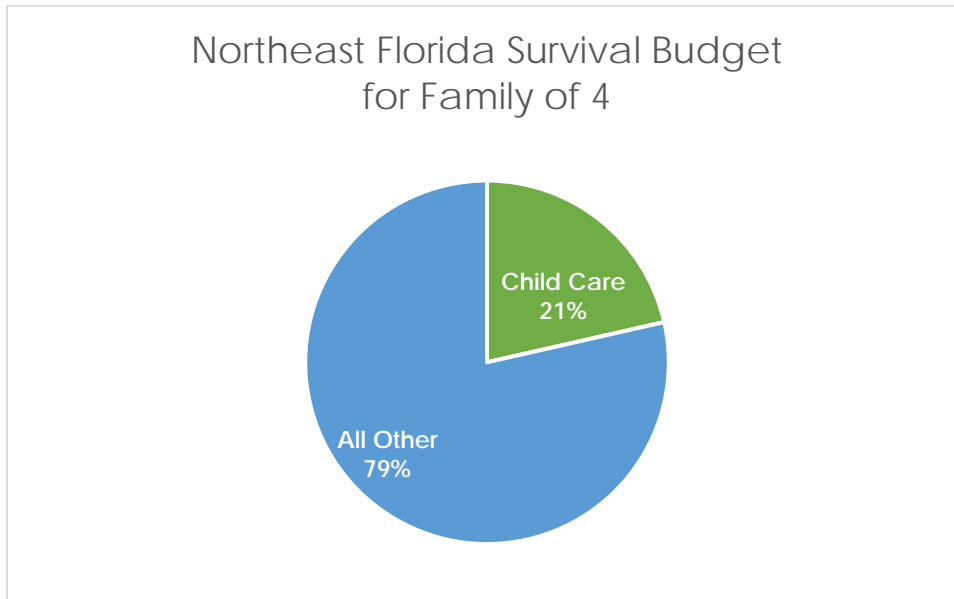

Kindergarten Non-Promotions

While many factors can impact whether a child is not promoted to kindergarten, one key factor is the opportunity for young children to access quality early education.

Childcare Cost

Cost of childcare impacts a family's ability to work and earn income. The United Way ALICE Report, published in 2018, provides a comprehensive look at the financial struggles of low-income families (ALICE is the acronym for **A**sset **L**imited **I**ncome **C**onstrained **E**mployed). One of the key financial indicators is the percentage of a Household Survival Budget that is required to pay for childcare for a family with 2 adults, 1 school-age child and 1 preschool child.

	Child Care Cost	Survival Budget	% Child Care
Baker	\$ 753	\$ 4,027	19%
Bradford	\$ 1,035	\$ 4,301	24%
Clay	\$ 1,047	\$ 4,786	22%
Duval	\$ 973	\$ 4,680	21%
Nassau	\$ 1,030	\$ 4,762	22%
Florida	\$ 1,024	\$ 4,597	22%

Childcare Cost Assistance

School Readiness provides vouchers to pay for a portion of a low-income family's childcare costs. While the number of vouchers has increased in the past 3 years, the number of children in need – defined at 150% of the Federal Poverty Level – has increased faster.

2014			
	Vouchers	Need	% Served
Baker	295	955	31%
Bradford	246	714	34%
Clay	910	4,070	22%
Duval	7,420	29,832	25%
Nassau	219	1,772	12%
Northeast Florida	9,090	37,343	24%

2018			
	Vouchers	Need	% Served
Baker	377	736	51%
Bradford	326	725	45%
Clay	1,084	4,657	23%
Duval	10,282	31,286	33%
Nassau	318	1,474	22%
Northeast Florida	12,387	38,878	32%

Schedules of Parents

Parents need care for their children when working or attending school or job training. The following shows the differences in the percentage of parents with young children (under six) compared to the general population for work and school/training.

This chart identifies when people are working by hour of the day.

Resources for Children and Families

Resources for Children with Disabilities

With support from the Florida Transition Project, community's have established Interagency Agreements for services provides to children with disabilities. The goal of the agreements is to avoid duplication of services and promote cooperation.

- Appendix 2 has the partners in each community's Interagency Agreement

211 for Social Services Referrals

United Way provides the 211 service to help connect families with needed resources. All communities have 24 hour telephone access and some communities also have searchable databases. The types of referrals available are identified.

1. 24 Hour Telephone Access

- a. United Way of Northeast Florida (Baker, Clay, Duval, Nassau, Northern St. Johns Counties)
- b. United Way Marion County
- c. United Way of North Central Florida (Alachua, Bradford, Dixie, Gilchrist, Levy)
- d. United Way Citrus County
- e. United Way Lake and Sumter Counties (Lake)
- f. United Way of St. Johns County (Putnam, St. Johns)

2. Online Searchable Database:

- a. Northeast Florida Online Database (includes providers in Putnam and St. Johns Counties)
http://www.mycommunitypt.com/nefin/index.php?option=com_cpx
- b. Marion County Online Database
http://www.mycommunitypt.com/nefin/index.php?option=com_cpx
- c. Lake County Online Database
<http://www.navigateresources.net/211CommunityResources/>

3. Types of Referrals Available

- a. Housing
- b. Financial Aid, Clothing and Material Goods
- c. Food and Transportation
- d. Disaster and Emergency Services
- e. Legal, Tax and Immigration Services
- f. Education and Employment
- g. Health and Medical Care
- h. Health Insurance, Medicaid and Medicare
- i. Mental Health and Substance Abuse
- j. Consumer and Public Safety
- k. Community, Children and Elder Services

Housing

Each community has established a Continuum of Care to direct resources for services for people experiencing homelessness as well as to support affordable housing needs.

- Appendix 3 has a list of the Continuums of Care across the state

Early Learning Coalitions

Each community has an Early Learning Coalition to steward state and national funding for Childcare vouchers, Voluntary Pre-Kindergarten, and Childcare Resource and Referrals.

- Appendix 4 has a list of the Early Learning Coalitions across the state

Department of Children and Families

This is the state organization where families can access food, medical assistance and cash, report abuse and neglect, and obtain information on childcare. The site address is www.myflfamilies.com
